PRE-INSTRUMENT CLEANER

INSTRUMENT PRE - CLEANER™

For deep cleaning and conditioning of **surgical instruments prior to sterilization.**

PRE INSTRUMENT CLEANER is a unique formulation of disinfectants, detergents, non-ionic neutral pH surfactants, sequestering agents and corrosion inhibitors.

It quickly breaks down and removes the most stubborn organic encrustation. Including blood, fat, carbohydrates, starches and protein.

COLD STERILANT

COLD STERILANT™

For the safe, cold sterilization and disinfecting of your surgical instruments.

SAFE:

Non-toxic, Non-Corrosive, Non-Irritant, Non-Staining, Non-Caustic, Non-Carcinogenic, Biodegradable, pH Neutral. Contains no Aldehydes, Phenol or Chlorine.

QUICK:

Sterilizes in 30 minutes and Disinfects in 5 minutes with a residual activity that keeps on killing microbes.

EASY:

Ready to use, no fuss, no smell and no need to rinse.

STERIGEL

STERIGEL

A safe water free hand wash that provides hygiene protection and a moisturizing lubrication

Sterigel is a non-greasy, non-sticky, perfumed, non-irritating skin care formulation that forms a silicone barrier on the skin surface to further protect you from disease.

It contains Quadex as active ingredient shown to kills 99.99% of most disease-causing microbes.

ECOHAND

ECOHAND

A professionally acclaimed, fresh scented hand wash

EcoHand is a pH neutral-, deep cleansing hand wash gel.

It is formulated with a Twin-Chain-Quaternary-Ammonium compound to give you the necessary microbial protection.

* **Quadex has deliberately excluded any animal by-products, sodium chloride, sulfonates, sulphate and other harsh chemicals.**

SUCTION CLEANER

SUCTION CLEANER

A disinfecting and deodorizing cleansing liquid - designed for surgical evacuation systems.

Suction Cleaner is a highly effective evacuation system

Clinically proven to clean lines and discourage build-up.

It breaks down and dissolve bacteria-laden solid debris like coagulated blood, saliva, prophylaxis or impression materials (sodium alginate, polyether and silicones).

STERIFOG

STERIFOG

Is a high level disinfecting spray that bonds to virtually everything, killing off 99.99% of all harmful air floating pathogens.

EXPOSED AREAS are typically e.g. – Patient rooms, baby rooms, office buildings, smoking rooms, small kitchens, office toilets, walk in fridges etc.

UNEXPOSED (HIDDEN) AREAS are typically e.g. – under sinks, under desks, air conditioning vents, fridges, dishwashers and dustbins areas.

It can be applied through:

Automated Dispensers - To release a fresh dose on set intervals.

Spray cans – To be applied as the need arise (manually).

Fogger cans – To be emptied in an area that was highly contaminated.

DeWax™

DeWax™

Is a natural citrus solvent that removes wax and glue.

A highly concentrated, non-toxic, environmentally friendly, naturally formulated solvent, that is safe to use to clean tough stains.

With D-limonene, the active ingredient, is derived from orange peels, a renewable resources.

Removes: Wax, window decal glue, insects, tar, asphalt, scuff marks from vinyl, chewing gum, inks and pen marks on fabric, soap scum, adhesive residues and most oils.

Q – WET WIPES

Q - Wet Wipes

These high level disinfecting wet wipes designed to disinfect a variety of surface areas.

Uses include, but are not limited to:

Surgical-, Procedure Rooms, Incubators, Centrifuges etc.

BIGUAMINE WOUND WASH

Biguamine™

Our Biguanide/Amine mix is an antiseptic liquid solution.

Efficient in the cleaning of wounds, grazes, cuts, stings and burns.

Providing you with a gently wash to remove dirt or grime from cuts and grazes
It is also effective in cooling and disinfecting stings and burns.

Overall it protects against infection by cleaning and killing harmful microbes.

Bacterinil® – Hard Surface Disinfectant

Bacterinil®

Residual action, non-toxic disinfectant for neutralizing pathogens on all hard surfaces during day-to-day activities.

Broad spectrum, biodegradable, ready-to-use general disinfectant. No rinsing or wiping required.

Use in waiting areas, holding cages, kennels, examination tables, work surfaces, floors, walls etc.

PH neutral, no aldehydes, phenol or chlorine, non-carcinogenic, non-caustic ,non-corrosive, non-irritating.
